

LVB401 Rope Lock-Off System for Secondary Diving Lifeline

When used with the Barry diving lifeline (# LV401), this system allows the rope to be locked-off, thus allowing tensioning the rope, and is easy to adjust when lifeline is loaded.

The optional pulley system permits a better alignment when loading the lifeline when pulling angle is critical.

Option: LVBOPT401

SPECIFICATIONS

- 3.65 m (12') nylon anchor loop yellow # ALB12
- Self-locking forged steel carabiner # N256G-2
- Rescue 8 steel descender # 300850
