

Dynamic & Static Testing

Product code : **DYNAMIC-AND-STATIC-TESTING**

DESCRIPTION

Use your ropes and nets with confidence by testing your systems in **Barry's testing laboratory**.

Are you searching for more information regarding the forces transferred onto your anchor points or the real safety factor of your system? Do you wonder what would happen if one of your system's components were to fail?

Whether you have a rope or netting system, the Barry testing team can supply the technical data you need in the design of your rope or net system. Whether you would like to recreate an accident scene or an incident wherein your ropes or netting are implicated, or need help designing a system, **Barry can help you get the answers you need!**
