Barry Vertical Safety Nets

Product code : **NP-BBHO**

DESCRIPTION

Barry vertical safety nets are designed to act as barriers to contain and decelerate projected or flying objects. These are highly customizable and can act as temporary or permanent safety measures.

Highlights

- Designed to be installed and disassembled quickly and easily
- Materials are lightweight, flexible, and strong
- Combinations of multi-layer netting and mesh allow high strength and optimum capture of flying debris
- Net panels can be easily installed between two columns or structures and can be tensioned with our versatile and adjustable attachment system
- Multiple attachment points can be connected and adjusted easily
- Oversized net panel design allows a single net panel to be used in multiple areas for maximum versatility and economy
