

Helicopter Interior Cargo Nets

Product code : **P-HIN**

DESCRIPTION

Barry offers interior cargo retention systems to secure loads to the inside of helicopters during transport. They are designed to keep loads securely in place and withstand impact forces in the event of a crash per Code of Federal Regulations (CFR) design requirements.

These systems attach to existing anchor points in the aircraft and are easy to install and remove as needed.

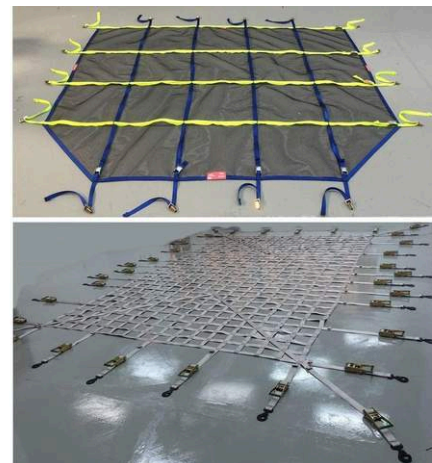

Barry offers turn-key interior cargo net systems for the following aircraft and can design and fabricate other models upon request:

- Bell 412 / Bell 212 (Floor & Cabin)
- Bell 429 (Cabin & Baggage Bay)
- Mi-171 (Floor)

These products are tested and supported by a complete Airworthiness Substantiation Analysis.

System includes

- Interior cargo net
- Transport/Storage Bag
- User Manual
- Serial #
- COC
