

### Heavy-Lift Longline Jacket with Double Zipper + External Helix

The unique longline jacket with double zipper and external helix offers all the advantages of our double zipper closure with the added anti-vibrating external helix.

By breaking the aerodynamic airflow around the longline, the helix limits the vibrations and oscillations frequently observed on larger synthetic longlines used with heavy-lift helicopters, thus allowing greater flying speed.

#### Features

- Double zipper closure offers redundancy for added safety
- Easy access to the longline for inspections
- Keeps the longline separated from electrical wire(s)
- Integral connection to the top of the longline for ultimate strength
- Protects the longline from abrasion, UV rays and contamination by dirt

Integral top connection with warning label

Double zipper closure separates longline from wire

#### SPECIFICATIONS

- For longlines over 19 mm (3/4") diameter
- Made of durable nylon fabric and heavy-duty zipper
- External helix for vibration control
- Internal flap protects rope from zipper
- Top cinch strap incorporates warning label
- Custom made to closely fit the longline/wire(s) size (Contact Barry to confirm model required)
- Standard color: Fluorescent orange (Also available in regular orange, tan, OD green and black)

#### Also available

# **LLJZ-HL**: Heavy-lift longline jacket without external helix
